

In order to protect the health of our patients and staff we have implemented new safety measures.

Things to take note of before your next visit with us:

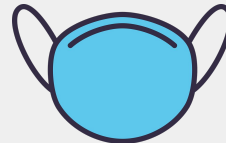

If you or anyone in your household has been sick or traveled internationally in the last 2 weeks, we ask that you reschedule

We will ask you screening questions concerning COVID-19

When you arrive please remain in your car and call/text us that you have arrived

Please bring a mask with you. We ask that you wear one into the office.

We are only allowing patients with appointments as well as one parent/guardian into the building

After being seated we will ask you to gargle with a 1% hydrogen peroxide rinse

We will come to your car, take your temperature, have you sanitize your hands and fill out a treatment consent form
